Cherished dreams

New collection of embroidery kits - "Cherished Dreams"

In our works, RTO designers offer innovative solutions, variety of designs, unique presentation and exclusive embroidery techniques.

By using special techniques and common laws of painting in all works with DMC threads, we create an atmosphere of lightness, airiness and transparency. At the same time, we keep the brightness of all colours in order to convey the important details in subtle colour transitions.

A very popular watercolour painting technique is presented in our catalogue in the works that accurately convey the effect of paint spillover and give a feeling of lively watercolours...

You will discover the magical visual transformation of threads in DMC palette. Large interior designs shine from within, the harmony of all shades creates a play of light, enhances the brightness of colours and decorative.

For the first time in this catalogue, we present new designs filled with various types of stitches, nodules (Girl and deer, Fox), giving them special elegance, delicacy and volume. We revive the old and forgotten techniques into the modern trends.

Embroidered floral compositions, landscapes, still lifes, cute childrens designs and discreet charming Christmas miniatures will create an atmosphere of warmth, peace and tranquillity in your interior.

Another new trend in design are the decorative motifs and ornaments. Today very popular are the game of contrasts and venturous colour combinations. Round-shaped embroidery designs with fancy patterns look like decorative plates and present a riot of colours. Delicate inclusion of beads creates light flickering... Such decor plates, embroidered with fantasy, will look stylish in any interior.

Watch out for the new products by RTO and create your own unique collection!
